PROFESSIONAL SUMMARY

AI Engineer with 1.5+ years of production software experience specialising in agentic LLM systems, RAG pipelines, and AI-powered automation. Built end-to-end autonomous agents using LangGraph, LangChain, Groq LLaMA 3.3-70B, FastAPI, and Docker. Proficient in Python, prompt engineering, FAISS vector search, and AWS cloud deployment. Experienced in C#/.NET backend development. Strong SDLC and Agile delivery track record.

TECHNICAL SKILLS

AI & LLM Engineering: LangGraph, LangChain, Agentic Pipelines, RAG (Retrieval-Augmented Generation), LLM Integration, FAISS Vector Search, Embeddings, Prompt Engineering, LLMops, HuggingFace, Python AST

Languages & Frameworks: Python, FastAPI, C#, .NET, ASP.NET MVC, REST APIs, JSON, XML

MLOps & DevOps: Docker, Docker Compose, CI/CD, Git, GitHub, Agile/Scrum

Databases: SQL Server, Oracle SQL, Stored Procedures, Query Optimisation, Vector Databases

KEY PROJECTS

GH Bug Agent *Python, LangGraph, Groq LLaMA 3.3-70B, PyGithub, Docker, FastAPI, Streamlit*

- Engineered a fully autonomous AI agent that ingests GitHub issue URLs, localises bugs via Python AST analysis, generates class-scoped patches using Groq LLaMA 3.3-70B, and validates fixes inside an isolated Docker sandbox zero human intervention end-to-end.
- Designed a 5-node LangGraph state graph (GitHub Reader → Code Parser → Patch Generator → Sandbox Executor → Summariser) with automatic retry logic (up to 2×) and confidence-scored outputs; achieved verified PASS results on real `psf/requests` production issues.
- Deployed a terminal-themed Streamlit UI over a FastAPI backend; outputs production-ready `patch-<Class>.py` files and structured `report.md`, demonstrating full-stack AI product delivery.

Intelligent Research Assistant (RAG-Runner) *Python, LangChain, LangGraph, Groq, FAISS, FastAPI, Docker, HTML, CSS, JS*

- Built a production-grade agentic RAG pipeline integrating LLMs with private enterprise data (PDFs, Excel) using semantic chunking, FAISS vector search, and embeddings for contextually precise retrieval.
- Architected a self-correcting LangGraph agent with document-relevance grading and automatic Tavily web-search fallback, reducing hallucination rate and improving answer accuracy on out-of-corpus queries.
- Containerised with Docker Compose and nginx for one-command production deployment, enabling enterprise-ready scalability.

PROFESSIONAL EXPERIENCE

SMS Group

Executive Software Development

Kolkata, India

Aug 2025 – Present

- Automated complex operational workflows using WPF, C#, EF and LINQ, reducing loading effort by an estimated 40% across global business units.
- Designed and deployed RESTful and WCF APIs enabling seamless cross-system data integration across operations.
- Engineered high-performance Oracle SQL queries and joins supporting large-scale automated reporting, cutting average query execution time by 30%.
- Delivered features end-to-end across the SDLC in Agile sprints, consistently meeting milestone deadlines.

Graduate Engineer Trainee

Aug 2024 – Jul 2025

- Optimised legacy data pipelines and SQL query performance, achieving a **45% reduction** in data processing time and directly improving throughput for automated reporting systems.
- Built application modules applying SOLID principles and clean-code practices, reducing post-release defect rate across sprints.
- Championed Agile ceremonies sprint planning, retrospectives, and daily stand-ups enabling rapid iteration and on-time milestone delivery.

EDUCATION

Heritage Institute of Technology

Master of Computer Applications (MCA) Score: **85.5%**

Kolkata, India

2022 – 2024

Birla Institute of Technology, Mesra

Bachelor of Computer Applications (BCA) CGPA: **8.5/10**

Ranchi, India

2019 – 2022
